

For advanced data management and search

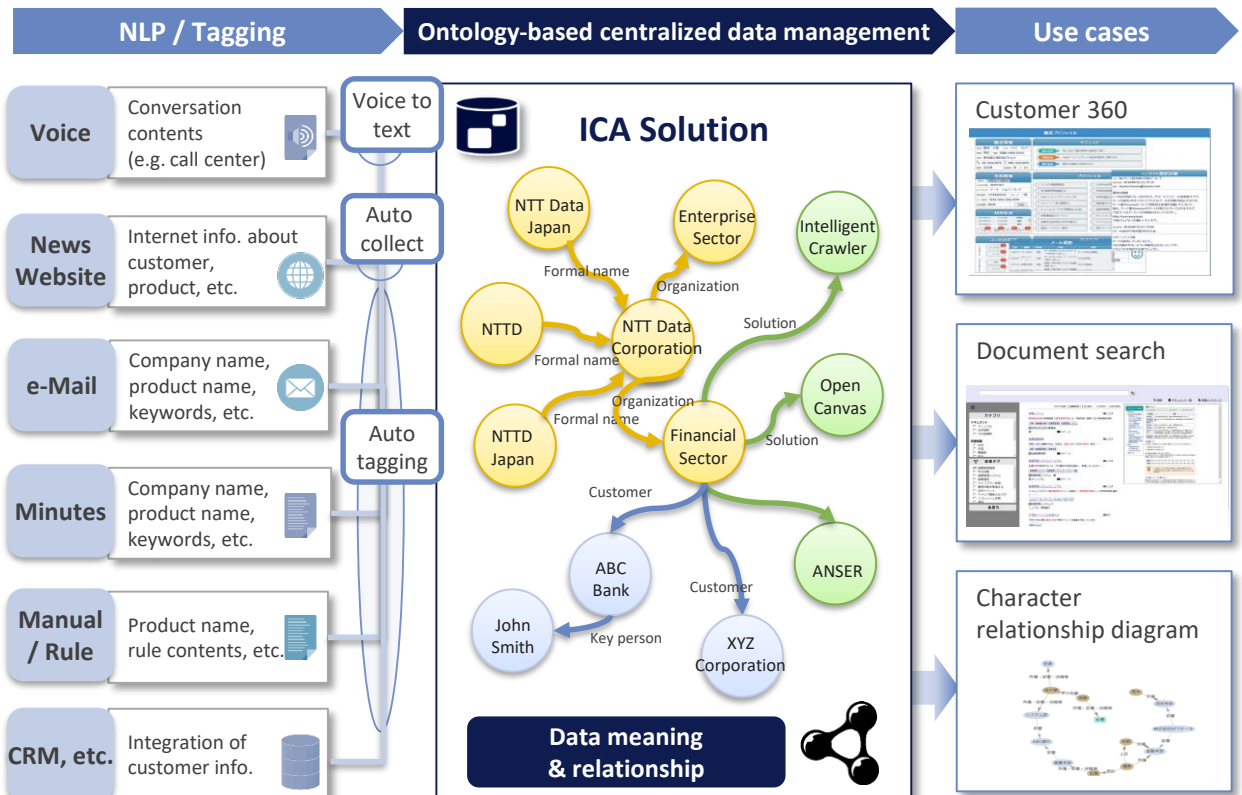

ICA Solution - Intelligent Contents Analysis

Solution concept

Data should be unified and actionable, not stuck in silos. Our solution allows you to actionable 360 degree view for topline growth through marketing strategy, product planning, customer relationship management planning and so on.

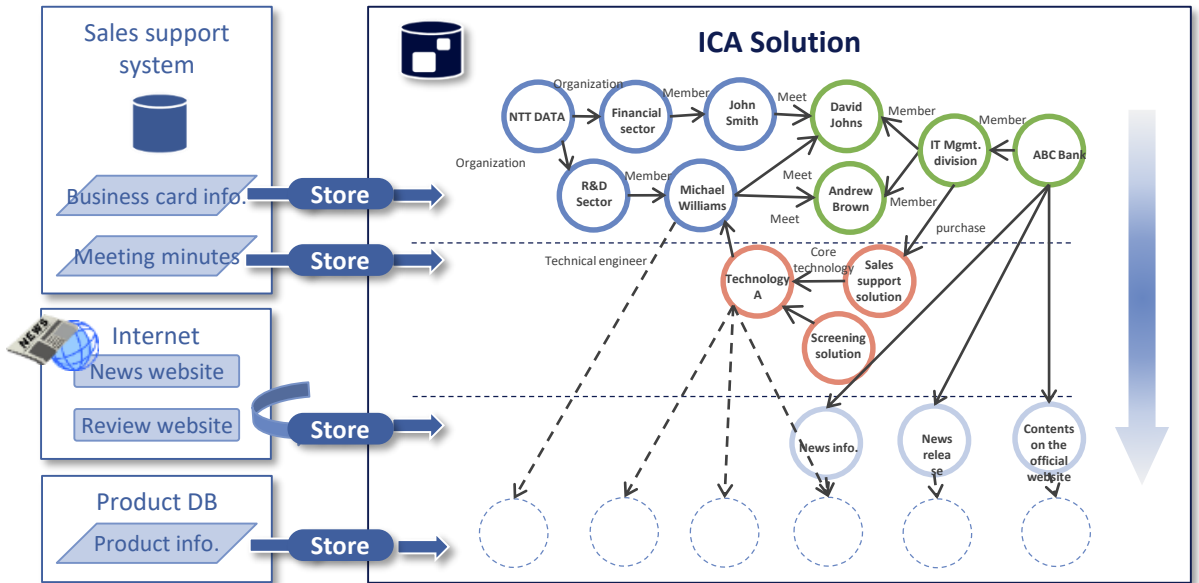

Solution overview

Use case: Customer information integration

Data silos can be integrated by creating relationships between data sets. Graph view enables you to recognize new relationships and key info.

Screen image: Document search
